Quiz 8: Least Constraining Value

Quiz 8: Least Constraining Value

1/1 point (ungraded)

Which of the following statements are true about backtracking search when using the LCV heuristic to choose the order in which values get assigned.

- ☐ If a solution exists, then backtracking search using LCV will never have to backtrack.
- ☐ If no solution exists, then backtracking search using LCV will detect that more quickly than without LCV.
- ☒ None of the above
